Physics Abstracts

Cumulative Author Index

1960-1964 : Part I

(VOLUMES 63-67).

Published by THE INSTITUTION OF ELECTRICAL ENGINEERS
Savoy Place, London, W.C. 2

In association with The Institute of Physics and the Physical Society
and The American Physical Society

FOREWORD

For the sake of simplicity and uniformity, all names beginning with articles or prepositions are listed as if written as single words, regardless of nationality (e.g. Van Vleck is listed as if written Vanvleck). Cross-references are included in appropriate places. Compound names are generally listed under the last component, unless hyphenated; exceptions to this rule are approximately cross-referenced.

All names are reproduced in the abstracts and the index with the same spelling as in the original articles; in the case of articles printed in Cyrillic characters, a letter-by-letter transliteration is given, in accordance with the scheme given on page iv. Russian authors' names may appear in Latin-alphabet publications in various forms, due to the use of different transliteration schemes; these names are reproduced as printed in the articles abstracted.

The numbers printed after the entries are the serial numbers of the abstracts, and the respective volumes are indicated by the initial number, giving the last digit of the year; thus "3=1234" means "Abstract 1234 of the 1963 volume"; "0=3456" means "Abstract 3456 of the 1960 volume".

June 1965

D. S. Hopper
Director, Science Abstracts

PHYSICS ABSTRACTS

CUMULATIVE AUTHOR INDEX

for 1960-64 is published in four parts:

Part I Letters A—E

Part II Letters F—K

Part III Letters L—R

Part IV Letters S—Z

Erratum

There are alphabetical errors occurring on the following pages:—

10-11 and 474

The use of l', n' and t' in Russian and Bulgarian (where they are not transliterations of a single letter, but merely l, n or t followed by the soft sign) is included to emphasize the fact that they are used for single letters only in Serbian.

Shch and sht invariably represent the letter Ш, in Russian and Bulgarian respectively, since the pairs of letters (Щщ in Russian and Шш in Bulgarian) seem never to occur consecutively in the respective languages.

The above table is reproduced, by permission, from the pamphlet "The Transliteration of Russian, Serbian and Bulgarian for Bibliographical Purposes" published by The Royal Society, Burlington House, London, W.1 (February, 1953, price 1s.0d.). It represents the system at present in use in "Science Abstracts" for the transliteration of the names of journals and the names of authors of articles abstracted.
